

Engr Zaheer Gardezi (Pakistan)- development practitioner and specialist in rebuilding and adapting rainwater harvesting for post-disaster situations.

Mr. Zaheer Gardezi has generously offered his time and experiences in water conservation and rainwater harvesting with audiences of SARNET initiatives to exchange knowledge and learning as a resource person at webinars, international conferences of SARNET, and a member of the SARNET international conference steering committee. He has been instrumental in promoting roof water harvesting in the “Building Back Better” program implemented by the Earthquake Relief and Rehabilitation Authority (ERRA) of Pakistan. He has many years of experience in Planning, Designing, executing, and Monitoring Development Programs / Projects; particularly, Donors Assisted, Physical Infrastructures, including WASH, Education, and Rural Access Roads in the Public Sector of Pakistan and AJK. He is a civil engineer and holds an MSC in environmental engineering.
